PROFESSIONAL SUMMARY

Java Full Stack Developer with strong expertise in building scalable and efficient applications using Java, Spring Boot, REST APIs, and MySQL. Skilled in both backend and frontend technologies, with a solid understanding of microservices architecture, object-oriented programming, and Agile methodologies. Experienced in collaborating with cross-functional teams to deliver high-quality software solutions that meet business requirements.

PROFESSIONAL EXPERIENCE - Java Full Stack Intern-The Kiran Academy - Java By Kiran, Pune | June 2024 – July 2024

- Developed, tested, and maintained web applications using Java, Spring Boot, and MySQL to streamline application functionality and improve efficiency.
- Built RESTful APIs for core application features and integrated microservices principles to support scalable architecture.
- Enhanced data management by using ORM tools like Hibernate and Spring Data JPA.
- Utilised Agile methodologies with Jira to track tasks, prioritise deliverables, and improve project timelines.
- Conducted unit testing using JUnit and Mockito.

TECHNICAL SKILLS

- Programming Languages: Java, Python, HTML, CSS, JavaScript, PHP
- Frameworks: Spring Boot, Spring MVC, Hibernate, Spring Data JPA.
- Databases: MySQL, PostgreSQL, NoSQL
- Web & Application Servers: Apache Tomcat
- Tools: Maven, Git, Jenkins, SonarQube, Swagger, Postman
- Testing Tools: JUnit, Mockito
- Methodologies: Agile (Scrum), RESTful API, Microservices Architecture (Basics).

PROJECTS

1. Blogging Application

- Developed a scalable backend blog application using Java, Spring Boot, and MySQL.
- Integrated Spring Security for user authentication and authorization.

2. Bank Application

- Designed and developed a console-based banking application using core Java principles and object-oriented design.
- Implemented features such as account management, transaction history, and balance inquiries, ensuring a user-friendly experience.
