TECH SKILLS / TECH TOOLS

Python - Numpy, Pandas, OpenCV
C language – GCC
Java – JVM, Libraries
Scala - IntelliJ IDEA
Scilab - Scilab IDE
Node.js – Node Package Manager (npm)
Express.js – Express Generator
MongoDB – MongoDB Compass
Neo4j – Neo4j Browser

CAREER OBJECTIVE

I am dedicated to leveraging my knowledge to contribute effectively in an innovative work environment. My goal is to secure a challenging position that fosters continuous learning and growth for a successful career.

PROJECTS

- **Exploiting Loop Holes –**   Sem 6 – Jan 2022
  - Developed a robust web application for tours and travels management System.
  - Integrated advanced security measures including Nessus vulnerability scanning to proactively identify and secure open TCP/IP ports

- **Placement Management System –**   Sem 2 – May 2024
  - The Placement Management System optimizes the placement process by offering students the ability to update profiles, apply for drives, and view opportunities.
  - Teachers can monitor department-wise placement statistics and organize drives, while companies can post openings and review student applications seamlessly.

EXPERIENCE

3Net TechDriver LLP   Sep 2022 – Sep 2023
Network Security Associate

- Expertise in firewall configuration and management, along with proficiency in router protocols such as OSPF and BGP
- Conducted comprehensive web application vulnerability assessments and network vulnerability assessments, contributing to robust security measures and ensuring the integrity of organizational networks
